X-Tenda Coat TPO Primer
February 12, 2020

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce X-Tenda Coat™ TPO Primer, a VOC-compliant, solvent-based product that improves the adhesion of acrylic coatings to recently installed TPO membranes (weathered less than 12 months). X-Tenda Coat TPO Primer can be applied using a brush, roller, or airless sprayer and is slightly tinted for visibility during application.

X-Tenda Coat TPO Primer is:

- Specifically designed for TPO
- Improves adhesion of acrylic coatings to both new and aged TPO (weathered less than 12 months)
- Low-VOC
- Tinted for visibility

Product Code	Product Description	Stock Status	Packaging	Coverage Rate
334850	X-Tenda Coat TPO Primer	T	5-gallon pail	0.25-0.50 gal/100ft ²

T=Tooele UT

Please note that effective October 1, 2019, Carlisle discontinued X-Tenda Coat T-23 Primer and replaced it with X-Tenda Coat TPO Primer.

If you have any questions, or for more information, please contact your manufacturer's representative.

Sincerely,

Austin Kulp
