

Carlisle SynTec Systems' Recycling Program

When it's time to replace a ballasted or mechanically-fastened roof, Carlisle offers a recycling program that allows you to be environmentally conscious and potentially save money in disposal costs. During one 12-month period, rooftop recycling diverted over five million pounds of old roofing materials from landfills and saved tens of thousands of dollars in disposal costs.

WHY RECYCLE YOUR ROOF?

- » Earns credits toward LEED® certifications
- » Positions your company as an environmental steward
- » Diverts material from landfill
- » Reduces carbon footprint
- » More government entities are requiring that old rooftop materials be recycled

THE CARLISLE RECYCLING ADVANTAGE

- » Container delivery, removal and transportation included
- » Coast-to-coast service
- » Recycle any ballasted or mechanically-fastened membrane (EPDM, TPO, PVC) or insulation
- » Convenient and simple
