### **Carlisle SynTec Systems Introduces 90-Mil Sure-White™ EPDM with 6" Factory-Applied Tape**

(Carlisle, PA) – Carlisle SynTec Systems, a leading manufacturer of single-ply roofing materials, is pleased to introduce the industry's thickest white non-reinforced single-ply sheet – 90-mil Sure-White EPDM with 6" Factory-Applied Tape (FAT™). The new 90-mil Sure-White membrane is 33% thicker than Carlisle's existing 60-mil Sure-White membrane, and is available for inclusion in Carlisle's 30-year Golden Seal Total System Warranty.

Sure-White has a 25-year track record, and is the first EPDM membrane to carry the ENERGY STAR® qualification. The new 90-mil Sure-White membrane is available in two sheet formats: 10' x 100' no-fold and the laborsaving 10' x 100' no-fold with 6" FAT.

"We are thrilled to introduce our 90-mil Sure-White membrane with FAT to a marketplace that is increasingly seeking high-quality, reflective roofing materials, said Scott Long, Carlisle's EPDM product manager. The 90-mil Sure-White membrane is designed to answer a need in the market that has been unmet until now."

**About Carlisle SynTec:** Carlisle SynTec Systems, headquartered in Carlisle, Pennsylvania, has been manufacturing single-ply membrane roofing systems for half a century. Carlisle SynTec is a business segment of Carlisle Construction Materials and has membrane manufacturing facilities in Carlisle, Pa; Greenville, Ill.; Senatobia, Miss.; and Tooele, Utah. For more information, call 800-479-6832 or visit [www.carlisle-syntec.com](http://www.carlisle-syntec.com).
