

# CARLISLE'S AUTHORIZED APPLICATORS MARKETING ANNOUNCEMENT

**TPO-2015-12**

**Thermoplastic Accessory Improvements**

**October 26, 2015**

**To: Carlisle SynTec Systems' Authorized Applicators**

Carlisle SynTec Systems is pleased to announce a number of recent upgrades to its Sure-Weld® TPO and Sure-Flex™ PVC accessory lines.

**Sure-Weld TPO Non-Reinforced Flashing now features 35% greater flexibility.**

Carlisle has improved the flexibility of its Sure-Weld TPO Non-Reinforced Flashing by 35%. In addition to enhancing the product's performance and ease of use, this increased flexibility will significantly reduce the time and effort required to field-fabricate certain details. The product codes, pricing, and available sizes and colors of Carlisle's TPO Non-Reinforced Flashing will not change.

**Improved order form is now available for thermoplastic custom accessories.**

Carlisle's thermoplastic custom accessory order form has been revised to include easier-to-understand graphics as well as options to select some of the more common custom accessories, including T-top and square-top vents.

**Sure-Weld TPO Yellow Pressure-Sensitive Warning Strip is now 6" wide.**

Carlisle's Sure-Weld TPO Yellow Pressure-Sensitive Warning Strip is now 6" wide, which means that it is more cost-effective and easier to install than the previous 12"-wide version. The table below contains the ordering information for Carlisle's new 6"-wide TPO Yellow Pressure-Sensitive Warning Strip.

Description	Old Product Code	Old Size	NEW Product Code	NEW Size
Sure-Weld TPO Yellow Pressure-Sensitive Warning Strip	318250	12" x 100' 1/CTN	325721	6" x 100' 2/CTN

If you have any questions, or for more information, please contact your local manufacturer's representative or distributor.

Best Regards,

David French  
TPO Marketing Manager
